

Subject Choice for Grade 8

Design & Technology
aims to help equip our learners for
living & working in a highly
technological world.

Design and Technology

Learners will develop their practical skills & ability to:

- **Problem solve** & seek out design solutions.
- Take the initiative in approaching their tasks, working both **independently & collaboratively**.
- Develop their **time management & tool management skills**.
- Take **responsibility** for making decisions & taking action.

Our students are encouraged & taught to:

- Make use of **Information & Communication Technology (ICT)** when working on various design projects.
- They will learn to **use digital resources & programs** to help them become better designers who are able to create beautiful prototypes & products.
- They will practice innovation & practically build projects by hand.
- They will investigate culture, social and environmental problems.

We create in the fields of:

- Communication, Advertising and Graphic Design
- Architecture, Interior and Landscape design
- Product design such as ceramics, jewelry, furniture design etc.
- Surface design and Textile design
